Leonardo Victor Palladino

Data Scientist | Credit Risk & LLM Evaluation

leonardovictorpalladino@gmail.com | Linkedin | Github | Spanish (Native) | English (Professional)

TECHNICAL SKILLS

- **ML & Data:** Python, SQL, Scikit-learn, Gradient Boosting, Pandas, NumPy, Statistics, PostgreSQL
- **AI & LLMs:** RAG, pgvector, LLM Evaluation, LLM-as-Judge, Agentic Systems, OpenAI API, Langfuse
- **Data Engineering & Infrastructure:** Oracle (PL/SQL), ETL Pipelines, FastAPI, Supabase, Docker, GitHub Actions

WORK EXPERIENCE

Data Scientist (AI & Automation) | AMPF (Asociación Mutual de Protección Familiar) *2026 - Present*

- **Credit Risk & Collections (Machine Learning & Statistics):**
  - Reverse-engineered the **credit score** from production PL/SQL, porting it to Python at **99.3% agreement**
  - Built an interpretable **scorecard** that beats the current credit score out-of-time (**AUC 0.73 vs 0.60**)
  - Trained a **Gradient Boosting** model on **30k members** to flag uncollectible debt, using a forward 18-month label
  - Caught **data leakage** with member-grouped splits, revealing **payroll timing**, not profile, drove card rejections
  - Segmented **20k members** for dual-channel collection, revealing **lack of funds** as the main rejection cause
- **Collections Analytics (Daily KPIs for Senior Management):**
  - Shipped the daily **collections KPI site** for senior management, fed by a nightly pipeline on the Oracle core
  - Rebuilt the KPIs at member grain, cutting the **generated-amount gap vs official figures from 7% to 0.5%**
- **LLM Chatbots (WhatsApp, RAG & Evaluation):**
  - Built a **multi-bot WhatsApp platform** with LLM agents and RAG, with **18k+ messages exchanged** since launch
  - Validated an **LLM judge** against a labeled held-out set (κ 0.86), then ran **8 controlled experiments** on real handoffs
  - Fine-tuned a 300M encoder **outperforming the GPT-4o-mini intent router (87.7% vs 83.0%)** at **9x lower latency**

Professional Freelancer (AI Engineer) *2021 - 2026*

- **SetterAI (Agentic AI CRM for Instagram DMs):**
  - Modeled sales chats as a **state machine of LLM-gated steps**, **raising step-to-step conversion 25%**
  - Added an **LLM-as-Judge veto** over the full chat, **cutting human handoffs 40%** with no off-script sends
- **ammegtech.com (Live Generative AI SaaS, Studio-Quality Catalogs):**
  - Chained **background removal** before **diffusion**, **cutting garment distortions from 28% to 9%**
  - Added **face and body reference conditioning**, **raising first-try image acceptance from 52% to 74%**

AI Engineer | AlgoLeads (Accepted into Anthropic's Claude Startups program) *2023 - 2026*

- **LLM Sales Agents (B2B Instagram Outreach SaaS):**
  - Deployed LLM agents running sales conversations across **300+ accounts and 30k+ DMs/month**
  - Achieved a **12% sales call booking rate** via state-based prompts and failure-case analysis
  - Used OpenAI Assistants with JSON schemas to **turn raw chat logs into structured datasets**
- **Live client use case: cumpleanito.com.ar:** deployed multimodal agents to autonomously extract birthday promotions (offers, redemption rules) from venues, engineering an **end-to-end ETL pipeline that fully automated manual workflows**

EDUCATION

- Master's in Data Science | Universidad de Buenos Aires (UBA) - *2023 - 2028 (Expected)*
- Bachelor's in Data Science | Universidad de Buenos Aires (UBA) - *2019 - 2023*

CERTIFICATIONS

- Agentic AI - DeepLearning.AI (2026)
- LangChain for LLM Application Development - DeepLearning.AI (2026)
- Generative AI with Large Language Models - DeepLearning.AI & Amazon Web Services (2025)
