Leonardo Victor Palladino

Data Scientist | AI Engineer

leonardovictorpalladino@gmail.com | Linkedin | Github | Spanish (Native) | English (Professional)

TECHNICAL SKILLS

- **ML & Data:** Python, SQL, Scikit-learn, Gradient Boosting, Pandas, NumPy, Statistics, PostgreSQL
- **AI & LLMs:** RAG, pgvector, LLM Evaluation, LLM-as-Judge, Agentic Systems, OpenAI API, Langfuse
- **Backend & Infrastructure:** FastAPI, Next.js, Supabase, Railway, Vercel, GitHub Actions

WORK EXPERIENCE

Data Scientist | AMPF (Asociación Mutual de Protección Familiar) *2026 - Present*

- **Machine Learning (Credit Risk & Collections):**
  - Replaced the **rule-based credit score** with Gradient Boosting, raising **AUC from 0.68 to 0.78**
  - Validated on out-of-time cohorts, **cutting the default rate 15%** at the same approval rate
  - Ranked the **collections queue** with a loan-loss model, **recovering 10% more per collector hour**
  - Caught **data leakage** via member-grouped splits, shifting collection strategy to payroll timing
- **LLM Chatbots (Inbound & Outbound on WhatsApp, RAG & Evals):**
  - Split the **RAG knowledge base by intent** with a router, **cutting context tokens 40%** at equal recall@5
  - Distilled the LLM intent router into a **small classifier**, **cutting routing cost 90%** at 94% agreement
  - Calibrated an **LLM judge** on human labels (0.8 on 300 chats), **blocking 6 regressions** before release

Professional Freelancer (AI Engineer) *2021 - 2026*

- **SetterAI (Agentic AI CRM for Instagram DMs):**
  - Modeled sales chats as a **state machine of LLM-gated steps**, **raising step-to-step conversion 25%**
  - Added an **LLM-as-Judge veto** over the full chat, **cutting human handoffs 40%** with no off-script sends
- **ammegtech.com (Live Generative AI SaaS, Studio-Quality Catalogs):**
  - Chained **background removal** before **diffusion**, **cutting garment distortions from 28% to 9%**
  - Added **face and body reference conditioning**, **raising first-try image acceptance from 52% to 74%**

AI Engineer | AlgoLeads (Accepted into Anthropic's Claude Startups program) *2023 - 2026*

- **LLM Sales Agents (B2B Instagram Outreach SaaS):**
  - Deployed LLM agents running sales conversations across **300+ accounts and 30k+ DMs/month**
  - Achieved a **12% sales call booking rate** via state-based prompts and failure-case analysis
  - Used OpenAI Assistants with JSON schemas to **turn raw chat logs into structured datasets**
- **Live client use case: cumpleanito.com.ar:** deployed multimodal agents to autonomously extract birthday promotions (offers, redemption rules) from venues, engineering an **end-to-end ETL pipeline that fully automated manual workflows**

EDUCATION

- Master's in Data Science | Universidad de Buenos Aires (UBA) - *2023 - 2027*
- Bachelor's in Data Science | Universidad de Buenos Aires (UBA) - *2019 - 2023*

CERTIFICATIONS

- Agentic AI - DeepLearning.AI (2026)
- LangChain for LLM Application Development - DeepLearning.AI (2026)
- Generative AI with Large Language Models - DeepLearning.AI & Amazon Web Services (2025)
